

Pacific Seacraft 40

Pacific Seacraft was founded in 1976 for the purpose of building superbly capable offshore cruising sailboats able to cross oceans and visit remote regions of the world. Since that time Pacific Seacraft and renowned yacht designer W.I.B. Crealock have maintained one of the most enduring builder-designer relationships in the marine industry. Our dedicated craftsmen, many of whom have been with Pacific Seacraft since its founding, continue to build offshore cruising yachts to the personal specifications of our clients, and have consistently carried out the construction of every new yacht with a passion fueled by constant feedback from owners and enthusiasts alike. Over millions of oceanic miles Pacific Seacraft yachts have earned broad respect and worldwide recognition for fulfilling their functional and aesthetic design purpose. We are dedicated to building yachts that are durable, easy to handle, responsive, and beautiful on the water.

Pacific Seacraft has been twice named by Fortune Magazine as one of 100 American made products that are the best of their type in the world (the only sailboat manufacturer twice named).

To be included, an item had to be state of the art-that is, at the height of innovation and technological advancement. It also had to be the most durable of its kind and provide good to great value for the price.

*-Fortune Magazine*

The new Pacific Seacraft 40 is a handsome addition to the line of bluewater cruising boats built by one of America's most consistent production sailboat yards. ...it is hard to imagine a better 40-foot boat for the serious business of world cruising.

*-Sailing Magazine*

The moment one steps aboard, it is clear that every part of the boat has been thought out carefully by someone experienced in the conditions likely to be encountered offshore. A yacht like this could be taken off the production line and confidently sailed straight off into the sunset without another thought.

*-Yachting Monthly*

In many ways, the Pacific Seacraft 40 defines a bluewater Passagemaker. There's no question that cruisers who want to experience their dream firsthand will be right at home in this boat.

*-Sail Magazine*

Without doubt, the most outstanding cross-section of cruising boats in this book is built by Pacific Seacraft.

*-Ferenc Mate  
The World's Best Sailboats*

...there are numerous fine production cruising boats on the market with hundreds of thousands of sea miles under their keels, as well as production teams with many lifetimes of boatbuilding experience behind them. I've always felt that one of these would provide us with what we needed, at a price that we might be able to afford, so long as the builder was flexible enough to work with us to customize the details (some builders are not). We began our search in earnest about a year ago by developing a seven-page list of desirable characteristics. In the final analysis, we chose the Pacific Seacraft 40, a W.I.B. Crealock design built in California.

*-Nigel Calder  
Sail Magazine*

We have been living aboard through 1,200 miles of cruising in all kinds of conditions. All systems are functioning perfectly. The boat not only sails beautifully, but is proving to be an extremely comfortable home. The family, which was strongly attached to the old Nada and quite resistant to the idea of a new boat, loves her.
